Our Company

Since 1947 we base our success on quality, research and innovation. This combined with our focus on customer care and optimization of materials has given us the capabilities to expand internationally. The high quality of our products are obtained through an optimal combination of industrial technologies and artisan process. Our R&D team of experts has the perfect combination of knowledge in advanced technologies and historical values, which gives us a unique position in the market.

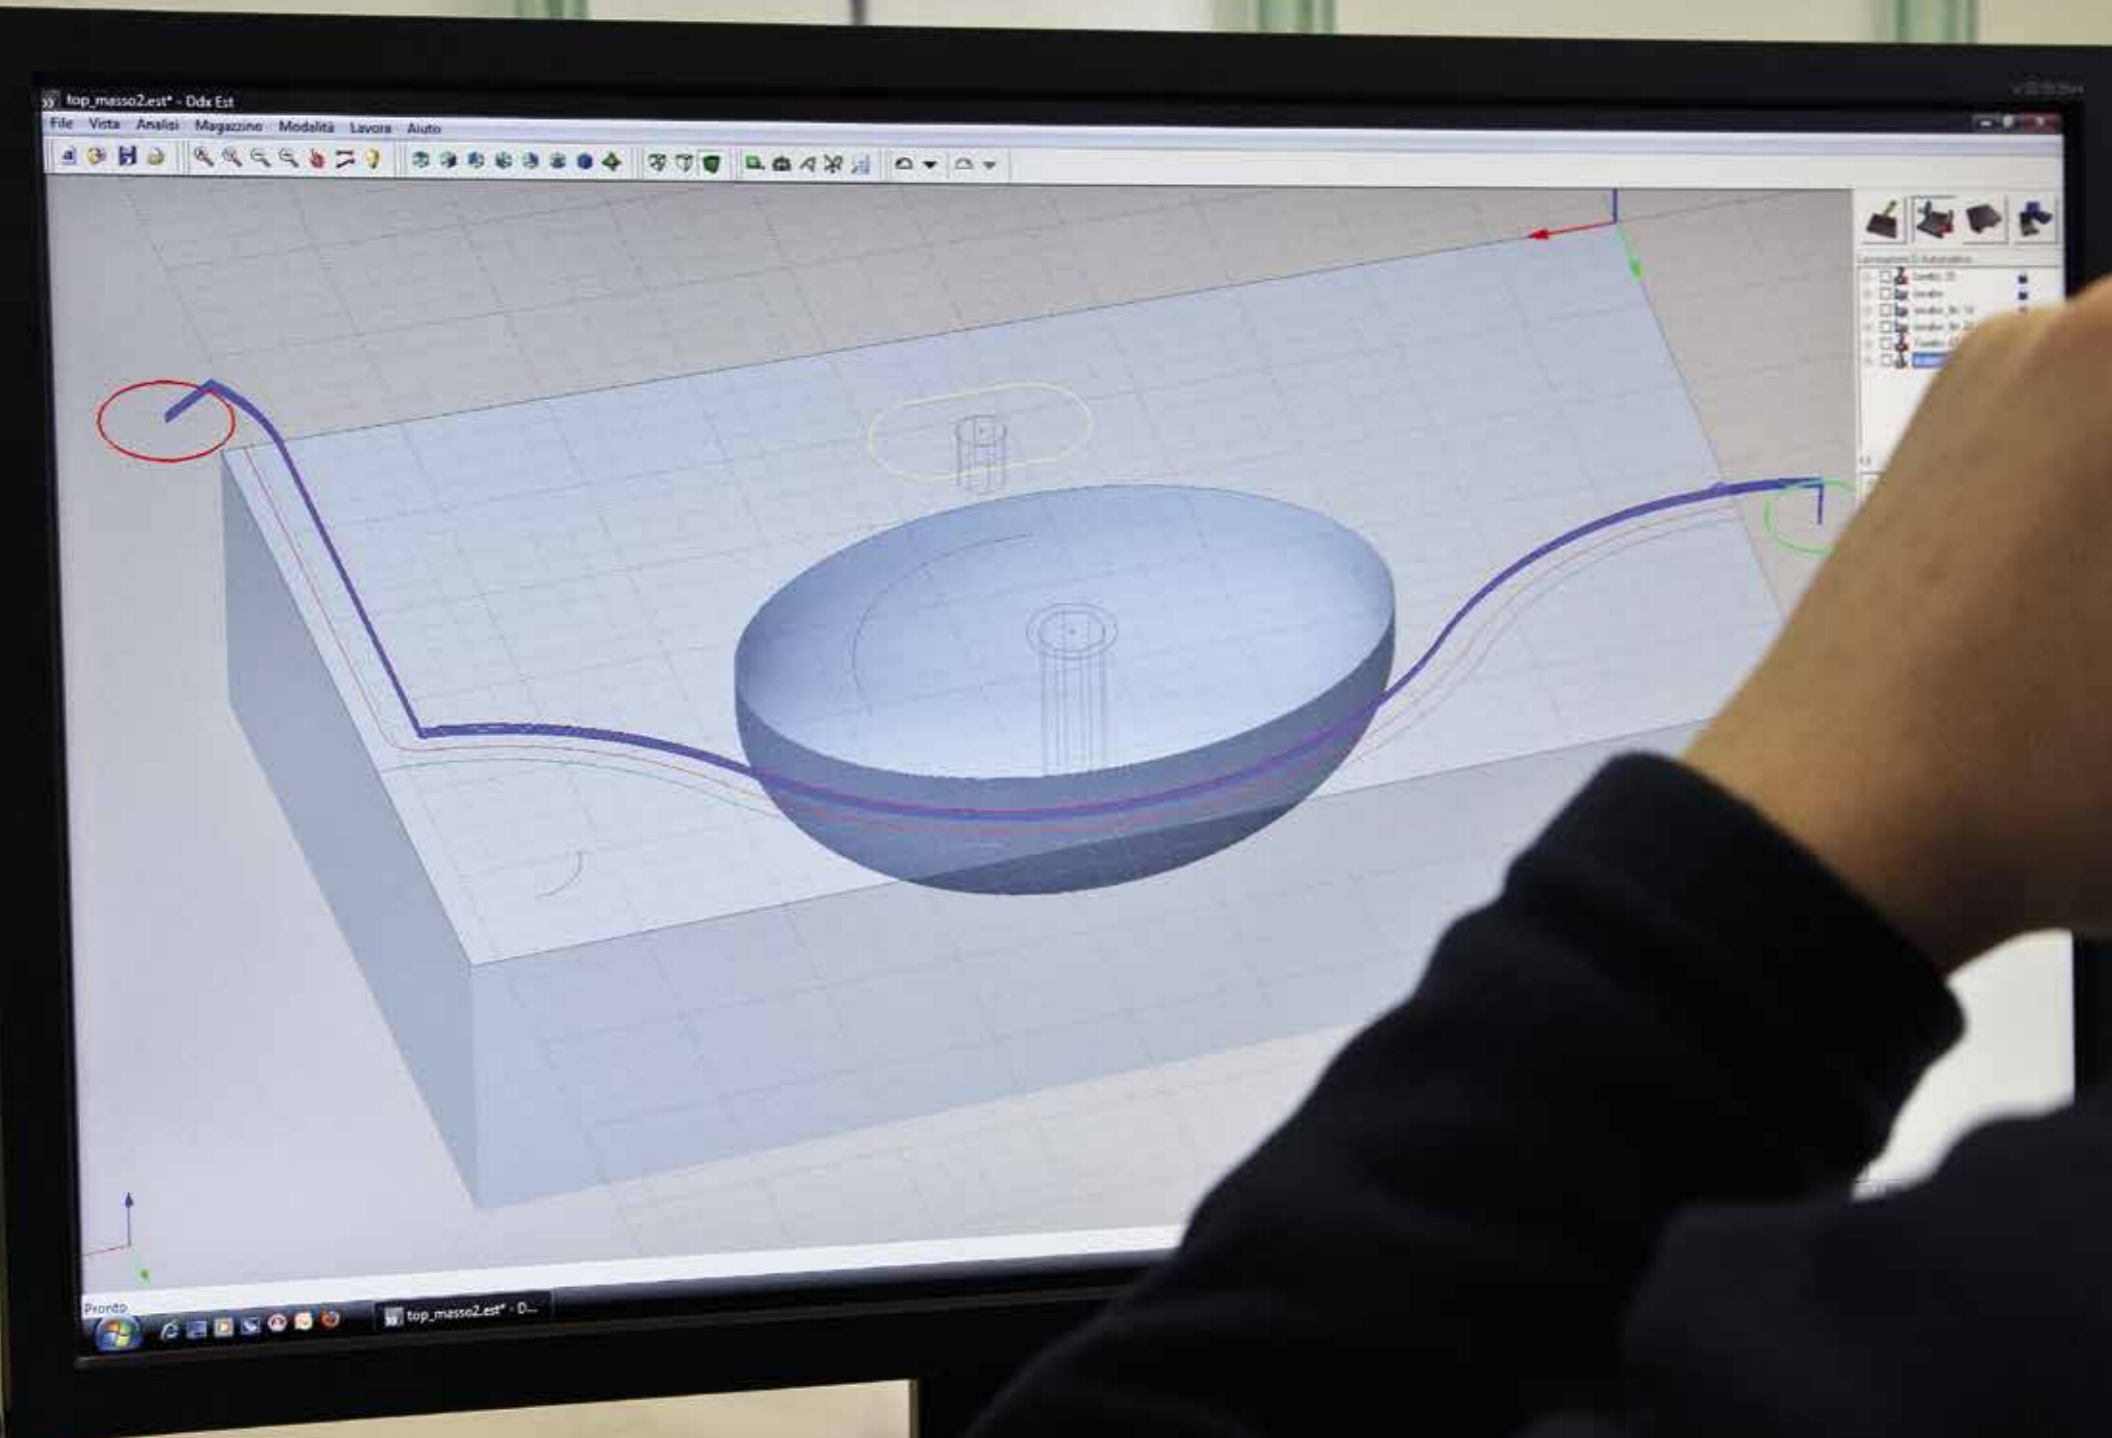

Our Approach

The ability to create timeless product has to be sought in synergy between artisan tradition and technological evolution, in the constant joining of creative ideas and design skills. Innovation is the fundamental instrument to reach a dual objective: provide a concrete answer to all issues, through the broad experimentation of new materials and productive technology. This approach allows a constant improvement of our operational efficiencies. Innovation process grants us to constantly interact with architects and designers, satisfying every kind of technical needs.

Our Services

At our company you are welcomed by real professionals, which assist the customers during their projects. The technical-aesthetic features of the materials are illustrated and discussed to obtain appropriate results. Our expertise will always be at the customer disposal for the detection of measurements on site, installation, and post-sale support.

Our story

1947 - OUR FOUNDATION

Vito Romagno in collaboration of two "MARBLE ARTISANS" sets up a craftsmen's workshop, undertaking minor jobs, by just using a cutter and a polishing machine.

1958 - THE FIRST PLANT IS ESTABLISHED, EMPLOYING 25 PEOPLE

Production is mainly done for residential buildings, but at the same time major project work is developed, using gang saws, bridge cranes, multi disk saws machinery, which at that time were considered at the forefront.

1968 - ROMAGNO MARMI S.r.l.

Thanks to the rapid commercial growth, a new 25 thousand square meters plant is opened, of which 2,500 sq. mt dedicated to production and 3,000 sq. mt as a storage area. The company now bears a new commercial name "ROMAGNO MARMI S.r.l."

1990 - THIN CUT PRODUCTION LINE IMPLEMENTED

Thin cut production line implemented. A state-of-the-art production line for cutting, calibrating and polishing slabs of various thicknesses, and in particular for thin cut requirements (1cm) is implemented.

1994 - NEW PRODUCTION LINE PURCHASED

A new production line is purchased. Polychrome inlays of various sizes and thicknesses can be developed.

1998 - FIRST NUMERICAL CONTROL MACHINE PURCHASED

The first numerical control machine is purchased. This new computerized equipment supports the production of shower trays, sinks, columns etc.

2008 - 2012 - MORE THAN 500 DIFFERENT TYPES OF MATERIALS.

Important acquisitions of various new materials are made, enriching the collection currently available covering more than 500 different types of materials to choose from.

2010 - MOVING ABROAD: THE LONDON HEADQUARTER.

Beginning of a major trade development abroad, with Headquarter in London. This strategic decision brings growth to the company internationally.

2013 - SECOND HIGH PERFORMANCE NUMERICAL CONTROL MACHINE

Acquisition of a second high-performance numerical control machine that allows an accurate and detailed production.

2015 - LOGISTIC REORGANIZATION

High performance numerical control machines that allow us to increase the volumes without compromising quality and attention to details.

2018 - 2021 NEW ROBOTIC SYSTEM

Acquisition of a robotic plant for the production of vanity, kitchen and table tops, shower trays and basins.

Our Projects

Romagno Marmi trademark is recognized internationally, thanks to years of experience acquired in producing bespoke stone works for projects around the world. A great landmark in this development has been realized with the opening of an office in London. The English capital, chosen as a logistic centre for the foreign market, allows to offer to our customers the maximum assistance.

Our Materials

We devote great attention and care to the selection of raw materials, through the employment of well recognized professionals who are active Worldwide. We have continuous updates of new materials. All technical information is transferred to our final customers, to assure that their choices are the results of an accurate and broader assessment. Since 1947, the year of our foundation, we have been establishing a strong and beneficial relationship with our suppliers, forging an authentic partnership.

Ethical Code

Our exceptional reputation is based on a strong ethical code which is ubiquitous throughout our company culture. We carefully evaluate each customer requirement, and ensure that the consultative approach to them is always in line with our quality standards. The productive process is carried out with the outmost ecological respect. We have reduced our energy consumption by installing an architectural integrated photovoltaic power plant, adopted a recycling water system. Differentiated waste collection through these measures, CO2 emission has been reduced, and the waste of energy and water has been minimized.
